DOOSAN

PUMA 1000 series

Large-sized Big Bore Heavy Duty Turning Center with Upto 560mm Spindle Bore

PUMA 1000 series

PUMA 1000A/MA

PUMA 1000B/MB

MACHINE GREATNESS™

PUMA 1000 series

The PUMA 1000 Series is DOOSAN's largest horizontal turning center, optimized for pipe & flange parts in the oil & gas industry, hydraulic components for construction machinery, aerospace and shipbuilding industry. It ensures powerful machining capability by using a 2 step gearbox and high torque motors together with a rigid box guideway structure. Especially new designed high rigid servo-driven turret is adopted to ensure more faster & stable tool rotation and machining stability in heavy-duty cutting and milling.

Contents

*PUMA 1000M with optional equipment.

Perfect specification for machining large work pieces.

Machining of large parts and powerful cutting in various industries with max. turning dia. ø1000 mm, machining length 2000 mm and max. spindle torque 12040 N·m.

Offering various sizes of pipe machining solutions

- Max. Ø560 mm (Ø22.0 inch) of big spindle through hole (bore) allow working on shafts and other parts that are longer than the distance between centers.
- PUMA 1000series are capable of threading work.

Improved productivity

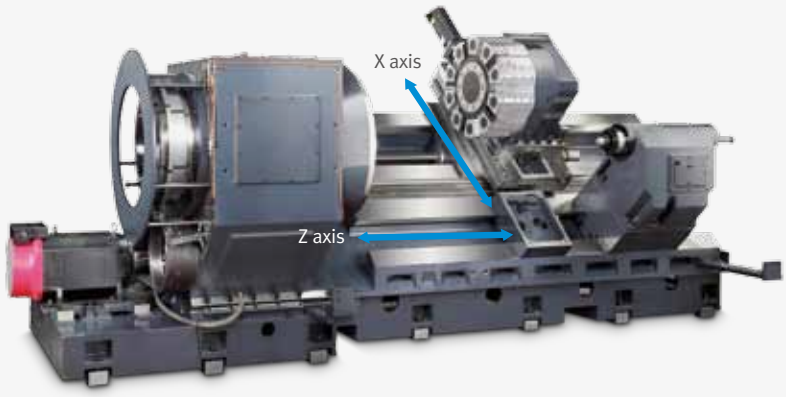
Turret indexing is possible even with a long boring bar(ø100xL1000 mm) mounted on a newly designed high rigidity turret for improved machining stability and productivity.

Basic Structure

45˚ slant bed with hardened and ground boxways is made of Meehanite cast iron. The basic structure is designed to minimize deformation in any heavy duty machining.

Structural stability of slant bed and box guideway

PUMA 1000 series has been developed with more than tens years of accumulated engineering know-how in manufacturing large-sized PUMA turning center. Its rigid structural base is to guarantee the stability of heavyduty cutting and easy chip drop.



Machining area

PUMA 1000series is ideally configured for big bore pipes used typically in the oil and gas industry, or for the production of a variety of large-machine parts.

Spacious working area to machine large-sized workpiece

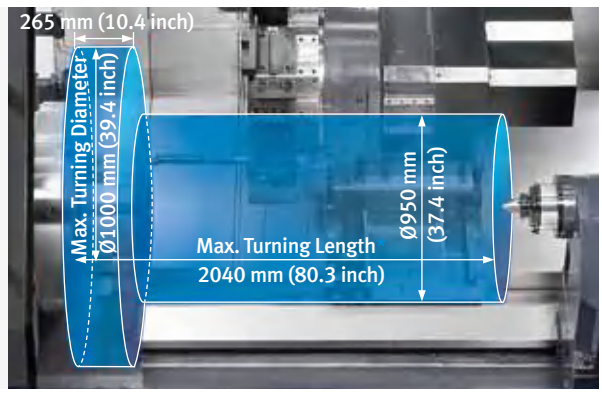
PUMA 1000 series could be applied to big steel rollers, large diameter flanges, long shafts of ships etc, thanks to its big spindle through hole and large swing for big workpiece.

Max. Turning Diameter

ø1000mm
(ø39.4 inch)

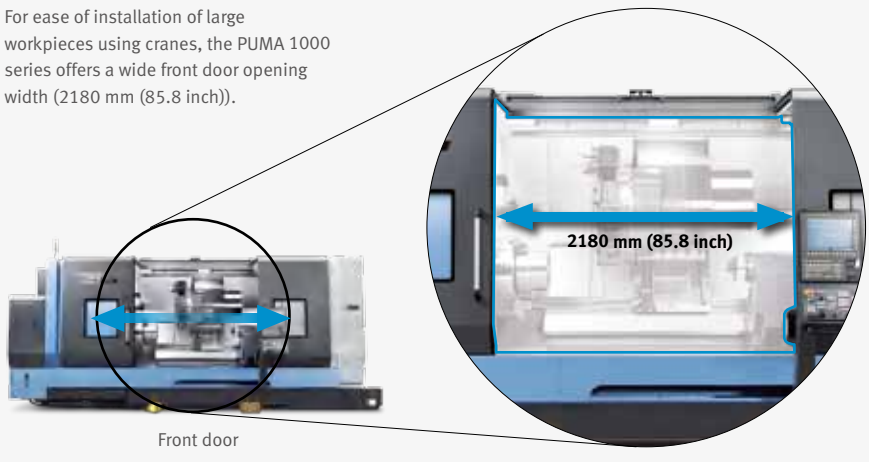
Max. Turning Length*

2040mm
(80.3 inch)



* : Max. turning length can be different depends on a chuck adopted.

For ease of installation of large workpieces using cranes, the PUMA 1000 series offers a wide front door opening width (2180 mm (85.8 inch)).



Spindle

Strong motor power and max. Ø560 mm (Ø22.0 inch) of big spindle through hole (bore) allow working on shafts and other parts that are longer than the distance between centers, such as an oil drilling shaft.

Extra large diameter of spindle though hole (bore)

The PUMA 1000series has a big spindle through hole upto Ø560 (Ø22")mm and powerful spindle of upto 75kW (100.1Hp) with 2-step gear box to ensure the strongest performance.

Max. Spindle Through Hole Diameter

PUMA 1000A/MA [1000B/MB]

ø375 [ø560] mm

(ø14.8 [ø22.0] inch)

Max.Spindle Power (30min/cont.)

75/60 kW

(100.6 / 80.5 Hp)

Max. Spindle Speed

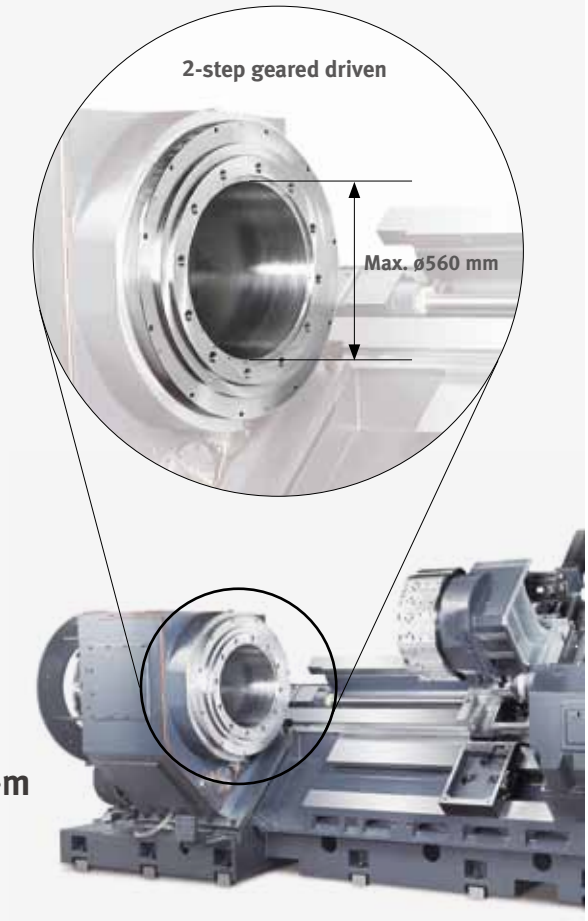
Max. Spindle Torque

PUMA 1000A/MA [1000B/MB]

11011 [12040] N·m

(8126.1 [8885.5] ft-lb)



Tailstock

High rigidity of programmable tailstock is available as standard to provide stable support of long workpieces.

Programmable tailstock with Built-in dead center

The tailstock supported by hardened and ground boxed ways is structurally one-piece with the machine base, which ensures the best structural rigidity. Its built-in type dead center supports heavy workpieces while maintaining machining accuracy.

Tailstock Travel

1900 mm

(74.8 inch)

Quill Travel / Quill Spindle Diameter

150 / ø180 mm

(5.9 /ø7.1 inch)

Built-in Dead center MT#

Turret

Servo-driven and its bigger thickness turret are adopted to ensure more faster & stable tool rotation and machining stability in heavy-duty cutting and milling.

Servo riven turret

The turret rotation and indexing is driven by a powerful servo motor which provides accurate positioning, fast and stable tool change. Comparing to the PUMA 600/700/800 series, turret thickness of PUMA 1000series is increased twofold.

Turret indexing is possible with Ø100 x L1000mm (Ø3.94 x 39.4) sized long boring bar in its turret.

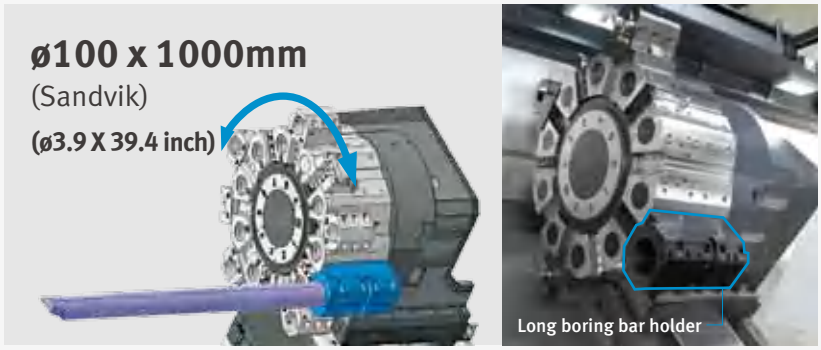
* Please contact DOOSAN to select detailed steady rest specifications

* 1) Each chuck comes with 1set of soft jaws as standard. ** Special Quotation.

Peripheral equipments

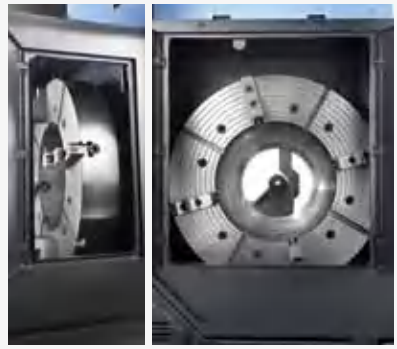
Long boring bar option

The long boring bar option allows you to easily machine deep holes to minimize cycle time. Please consult with Doosan specialist for details.



Twin chucking option

For more stable pipe threading process, twin chucking option(manual or pneumatic)is available. Please consult with Doosan specialist for details.



Steady rest option

For turning a part with extensive length, various types of hydraulic steady rests(Single, Double or Twin type) are available.

Auto tool setter option

Applicable during shaft machining, the pocket of the chuck cover accommodates the overhang of the tool, minimizing interference and enhancing tool usability.

Quick change CAPTO option

The Quick Change Tool system simplifies tool change operation. Recommended for users who need to change tools frequently or reduce the set-up time.

Coolant tank

Doosan's ergonomic roller coolant tank design, allows users to easily replace and refill coolant. Roller on the coolant tank allows users to simply take out and put it back in the machine like a drawer unit.

DOOSAN FANUC i

FANUC CNC is tunned ideally to PUMA 1000 series, in order to maximize productivity.

User-friendly operation panel

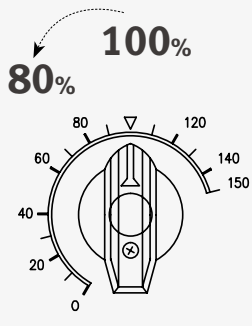
The newly designed operation panel groups all of the common buttons together to enhance operator's convenience. Also, 'QWERTY' keypad is applied as standard to improve convenience of users who are accustomed to PC keyboards.

10.4 " Display

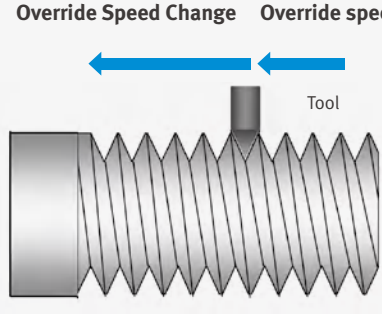
- USB & PCMCIA card (Std.)
- Qwerty type keyboard
- Easy to put button switch for attached option
- Ergonomic new design

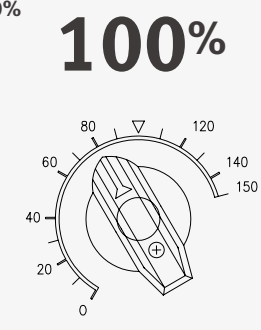
Arbitrary Speed Threading

This function allows users to control spindle speed in order to set it at an ideal machining condition to keep the best thread quality.



SPINDLE OVERRIDE





SPINDLE OVERRIDE

SKETCH-TURN option

DOOSAN Conversational programming software for PC

- Easy to learn for beginners
- Time savings in programming
- Reduce processing cycle time

Threading repair function

This function allows users to repair thread even when original program is not available and this is a standard Fanuc NC function.

Re-machining function option

This function allows users to re-machine damaged threads by using the existing program.

[1Step]
Chucking the damaged part

[2Step]
Manually positioning the tool into the machined thread with the spindle stopped

[3Step]
Retract the tool and run threading part program

Technical Center: Sales Support, Service Support, Parts Support

Doosan Machine Tools' Global Network, Responding to Customer's Needs nearby, Anytime, Anywhere

Doosan machine tools provides a system-based professional support service before and after the machine tool sale by responding quickly and efficiently to customers' demands. By supplying spare parts, product training, field service and technical support, we can provide top class support to our customers around the world.

Customer Support Service

We help customers to achieve success by providing a variety of professional services from pre-sales consultancy to post-sales support.

Supplying Parts

- Supplying a wide range of original Doosan spare parts
- Parts repair service

Field Services

- On site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair

Technical Support

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy

Training

- Programming / machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering
